

# USING SPACE TO PROVIDE SPACE FOR THE ENVIRONMENT

## MONITORING + DATA

- Copernicus / Corine Land Cover
- Land Use, Land Use Change and Forestry (LULUCF)
- Quality assessment / Quality control

## ASSESSMENT

- Mapping and Assessing of Ecosystem Services (MAES)
- Green Infrastructure (GI)
- Land Resource Efficiency
- Sustainable Development Goals (SDG)
- Disaster risk / Natural hazards

## DATA PROCESSING

- GIS analysis
- Image processing
- Process automation

## KNOWLEDGE + UNDERSTANDING

- Policy assessment + Policy support
- Capacity building
- Communication

**space4environment** is a company of GIS and Remote Sensing experts providing value adding services in the environmental domain. Our unique services include all the steps along the value chain from data handling via data processing to thematic assessments of European environmental policies. In Copernicus we focus on the start and the end of the processing chain, i.e. technical specifications of new products and QA/QC of final outputs.
